Flag: Follow up

Dear Mr. Benns,

The California Department of Toxic Substances Control received an Underground Services Alert for your excavation work along Griswold Avenue in Modesto California. Below is an email that I received that contains the USA alert. Please be advised that this work is being conducted near a National Priorities List Superfund Site known as Modesto Groundwater Contamination. A groundwater monitoring well referred to as MW-23A is located at or near your proposed excavation work. The well should be clearly seen at the ground surface. The attached map shows the location of this well. Please take care during your work so that the groundwater monitoring well is not damaged during your work.

Please give me call at (916) 255-3709 if you have any questions.

Regards,

Jim

Subject: Modesto Groundwater Contamination - Griswold Ave Constr Project

Hello Jim,

Good chatting with you.

An excavation project is taking place in proximity to the Modesto Groundwater Contamination site. I have pulled relevant information from the Underground Service Alert Notice below.

1. Project: OPEN TRENCH TO REPLACE WATER SERVICES
2. Location: GRISWOLD AVE STARTING AT VIRGINIA AVE HEADED 2000' TO THE EAST TO MCHENRY AVE, EXTENDING 15' INTO PROPERTY ON BOTH SIDES OF THE STREET
3. Excavator: Tony Benns, City of Modesto

Please evaluate if the excavation project is in conflict with the site. If necessary, let the Excavator know about our facilities in their project path. If you determine the project is not in conflict with the site, just let me know.

Thanks,

Greg
